

DR. WOLFENBERGEN

PETER BAUER

DR. WOLFENBERGEN × PETER BAUER

A fruitful dialogue arises from the collision of thesis and antithesis. There is no "out there" without a centre. No hard shell without a soft heart. There is no sound without silence, no black without white. And there is no snow without water.

What is the outcome if we let the high fidelity board feel of Peter Bauer's decks collide with the low fidelity misanthropic aesthetic of Justin Moll aka Dr. Wolf enbergen's artwork?

This!!! The award - winning Singular and Singular Twin, now in an alternative guise. Same stunning all - mountain performance, different message.

Enjoy the next level of riding.

Justin Moll, also known as Dr. Wolfenbergen, is a designer and illustrator hailing from greater Philadelphia. Justin creates low-fidelity artwork imbuing a quirky, misanthropic aesthetic that draws influence from historic advertising art, traditional tattoo flash, badly-drawn skulls, terrible typography, and photocopiers. His work has been recognized by the American Institute of Graphic Arts (AIGA), The One Show, Graphis, Communication Arts, and more.
